No payment required until time of service—protect your investment today

With over **45 years of experience** in Central Wyoming, **Overhead Door Company of Casper** would like to introduce you to our **Preventative Maintenance Program**. It's so beneficial and cost effective that it will extend the life span of your equipment, and provide safe, trouble free operation.

Increase Productivity While Decreasing Downtime

A **Preventative Maintenance Program** ensures proper equipment operation and avoids costly breakdowns. **That means no more time-consuming, unplanned, and costly repairs.** Our certified personnel will service your equipment with authorized parts so it adheres to the manufacturer's specifications.

Creates a Safe Environment

A few simple precautions can protect your family and friends from potential harm. **Overhead Door Company of Casper** will test and maintain your garage door to meet and exceed all safety practices.

Protect Your Investment

The **Preventative Maintenance Program** assures your investment does not rapidly diminish with the normal wear and tear of typical operation. Through monitoring your garage door and operator equipment, minor repairs and adjustments executed on a frequent basis forestall costly major overhauls and premature replacement.

Member Features and Benefits

With the **Preventative Maintenance Program**, you receive a full range of service treatments by certified and trained experts, which means trouble-free operation!

INSPECTION

All parts, fasteners, and overall operation are carefully inspected and evaluated.

ADJUSTMENT

Over time, parts become disengaged and misaligned. Therefore, adjustments are needed on a periodic basis. Our service professionals regularly adjust equipment as stated in the manufacturer's manuals to maintain proper working condition.

LUBRICATION *

All moving parts and assemblies receive applications of necessary lubricants according to the manufacturer's requirements.

FINAL INSPECTION

After a final inspection of the entire operation of the equipment, the **Overhead Door Company of Casper** technician makes recommendations and notes for required parts.

PARTS / EXTRA WORK **

While our program may extend the quality and duration of your equipment, it cannot guarantee unending life to any product. Eventually parts reach the end of their functional life and require replacement. Upon the customer's authorization, the necessary parts will be replaced. **In addition, as a member of the Preventative Maintenance Program you will receive 10% off all parts.**

COST AND EFFICIENCY

In order to assure a cost effective visit, we will pre-schedule the visit with you. Prior to the service call, your assistance in preparing easy access will help keep repair costs down and allow the visit to be dedicated on inspecting and repairing the equipment.

PRIORITY CUSTOMER STATUS

Between your scheduled appointments if something needs repaired, you will be our top priority.

The Genuine. The Original.

The most cost-effective way to avoid downtime, extend the life expectancy of your garage door, and to maintain safety is with **Overhead Door Company of Casper Preventative Maintenance Program**. **We offer affordable service for all your garage door needs, without the contracts or obligations!** No more worrying about calling to get you garage door and operator serviced.
